

Your best engineer can't be at 50 sites.

Their expertise can.

Swipe to see how India's top manufacturers
eliminated expert dependency — permanently.

The Expert Dependency Trap

■ 1 breakdown. 1 expert. 200 km away.

Hours of downtime. High travel cost. OEE destroyed.

■ Senior knowledge walks out the door.

Every retirement takes irreplaceable expertise with it.

■ Junior techs freeze without supervision.

Errors, rework, and unsafe workarounds follow.

■ Your current fix? A phone call.

Blind troubleshooting over video — slow and unreliable.

From 'wait for the expert' to 'expert in their ear'

BEFORE

- Phone call to HQ expert
- Wait hours (or days)
- ✈️ ■ Expert flies to site
- Fix. Finally.
- ■ 50K+ downtime cost

VS

AFTER · AjnaVidya

- Smart glasses stream live video
- Remote expert sees everything
- 👉 ■ Expert annotates in real-time
- Tech resolves. Minutes.
- Zero travel. Zero wait.

AjnaVidya

Connected Worker

Three things it does — nothing else matters more:

01

Live Annotated Video Assist

Expert sees exactly what the field tech sees. Draws arrows, circles, highlights — in real-time. No guesswork.

02

Hands-Free SOP Overlays

Step-by-step visual instructions on actual equipment. Tech follows the overlay. No manual, no memory required.

03

Automatic Proof-of-Work Capture

Every step logged with photo, timestamp, and signature. Fully audit-ready. Zero paperwork.

Numbers that matter.

45%

Reduction in OMS downtime
& expert dependency

0

On-site expert visits needed
for Tier-1 troubleshooting

3x

Faster first-call resolution
vs phone-based support

100%

Audit-ready proof-of-work
automatically captured

India's best trust AjnaLens.

■ **Tata Motors**

Remote Assistance + Guided Assembly
Truck Plant, Pimpri · 3 live POCs

■ **Suzlon Energy**

AI Smart Glasses for wind OMS technicians
45% downtime reduction — proven

■ **SKF Engineering**

Remote Assistance SaaS · Bangalore plant
6-month pilot · Live

■ **Hyundai India**

CAVE VR — hand & head tracking
Advanced assembly simulation

■ **UnoMinda**

Remote Assistance + AR Headsets pilot
Haryana plant · In deployment

■ **1,500+ ITIs**

AjnaXR Simulators — welding, painting
Largest XR skilling deployment in India

AjnaX AI Smart Glasses

"Light as your spectacles. Powerful as your best engineer."

■ AI Mentor on-device

Trained on your SOPs. Ask in Hindi, English, or Marathi. Get live guidance.

■ Camera + Computer Vision

Identifies equipment and fault patterns without manual lookup.

■ Bandwidth-friendly

Works on 4G / spotty networks at remote field sites.

■ Voice-first interface

Hands stay on the equipment. Voice logs, queries, confirmations.

Remote Assistance is just the start.

AjnaLens covers the full industrial lifecycle:

TRAIN	VR Safety Simulations · VR Skill & SOP Training · 1,500+ simulators live
EXECUTE	AR Remote Assistance · Guided Assembly · AR Inspection & VLO
OPTIMIZE	OMS / CXO Dashboard · Agentic AI Layer · Real-time analytics

Built at IIT Bombay. Trusted by India.

■ IIT Bombay, 2014

India's sovereign XR + AI stack · Deep-tech origin

■ 40+ Patents

Across XR, AI, and spatial computing

■ 5 Lakh+ Learners

Upskilled across industrial & vocational programmes

■ 1,500+ Simulators

9 Indian states · Largest XR skilling deployment

■ CES 2023 Innovation

AWE Auggie Award · iDEX Ministry of Defence

■ Lenskart & Paytm backed

Maharashtra Defence & Aerospace Venture Fund

NEXT STEP

Want to see this at your plant?

Book a 20-minute live demo.

We'll show you Remote Assistance running on actual smart glasses — your SOPs, your equipment, your team.
